

Advanced Data Analysis with GIS

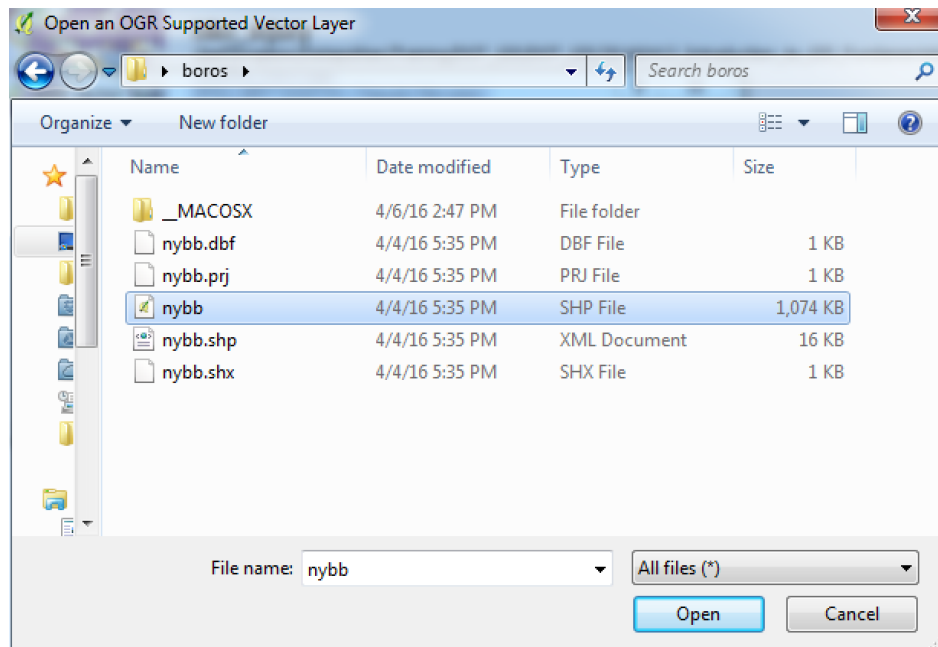

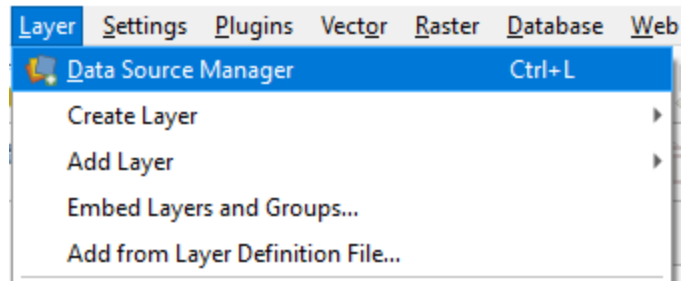

Follow along at: <http://bit.ly/advanced-analysis-gis>

See the code at: <http://bit.ly/advanced-analysis-gis-code>

Key Questions for the Morning

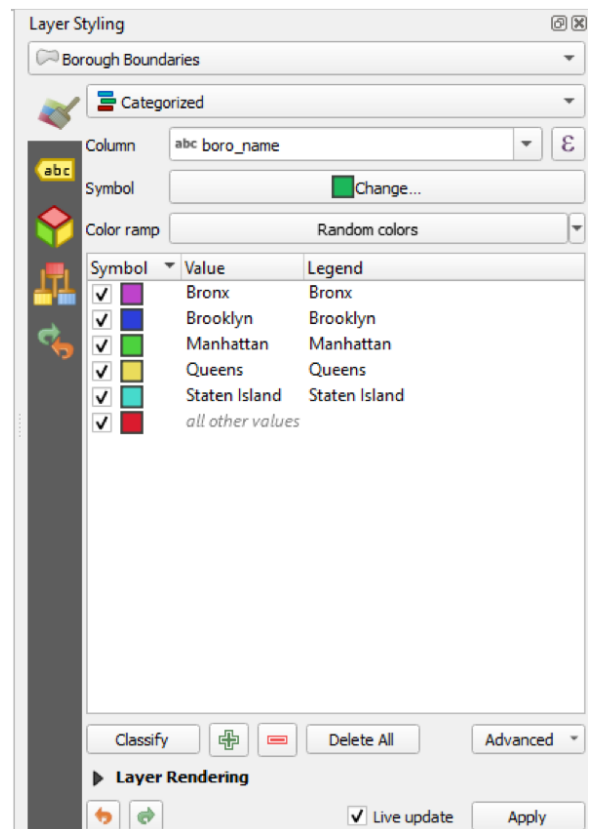

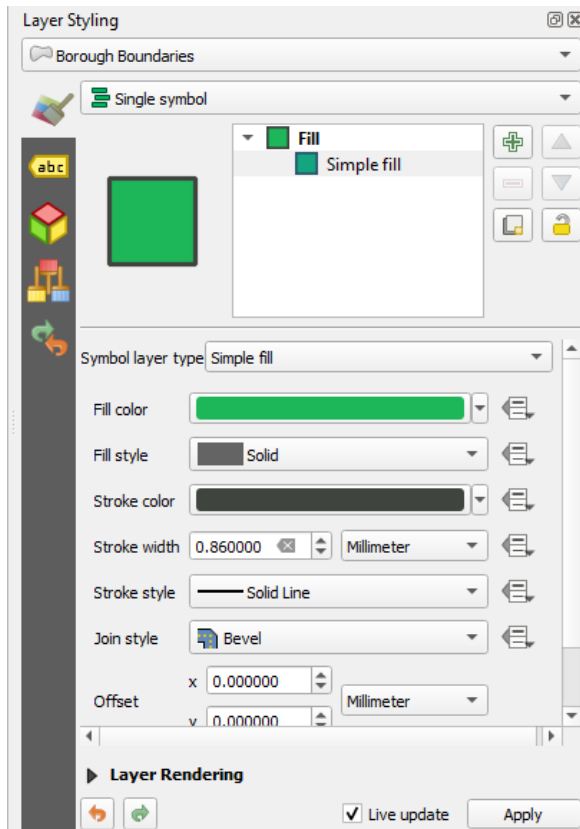

- What is a GIS?
- Why do we use GIS?

Loading a Shapefile

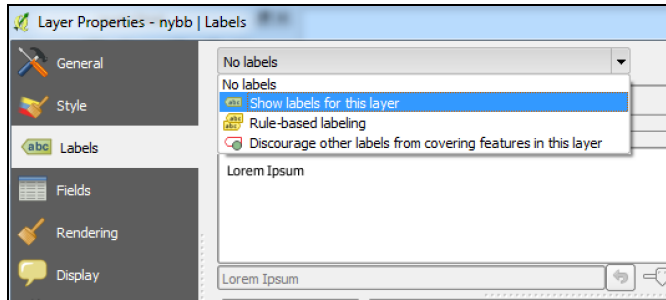

Styling Features

- Click the button on the top left of the Layers panel
- In the Layer Styling panel, select "Categorized"
- Select the column that has the data you want to style

Add Labels to Data

- In the Layer Styling panel select "Labels" -> "Show labels for this layer"
- Select the column that has the data you want to use for labels
- Select the label attributes you want

Shapefiles

- Key things to know

Adding Data from Data Warehouse

Create a New MSSQL Connection

Connection Details

Connection name

Provider/DSN

Host

Login

☒ Trusted connection

Username ☐ Save

Password ☐ Save

Database Details

Database

☐ Only look in the geometry_columns metadata table

☐ Also list tables with no geometry

☒ Use estimated table parameters

☐ Skip invalid geometry handling

Filtering Data in QGIS

Coordinate Reference System (CRS)

- What is it?
- Why is it important?

Data Types in QGIS

Type	Notes
integer	
real	
string	
date	

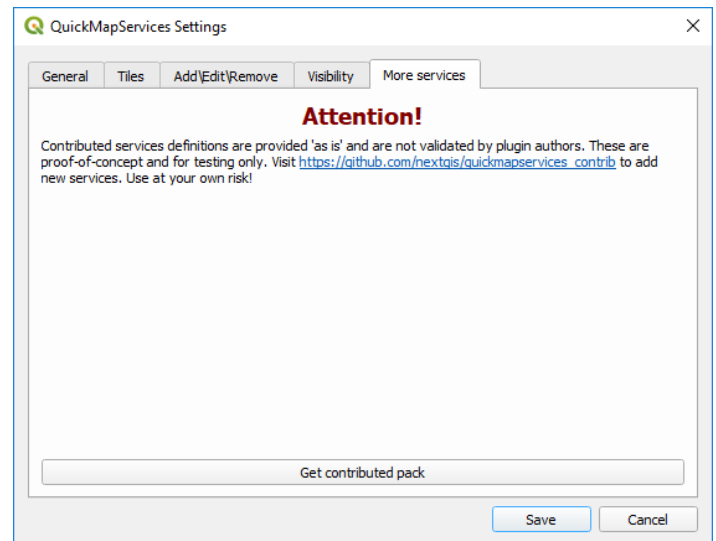

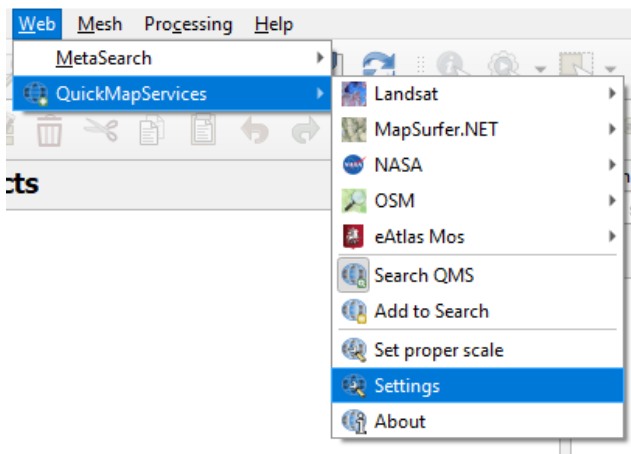

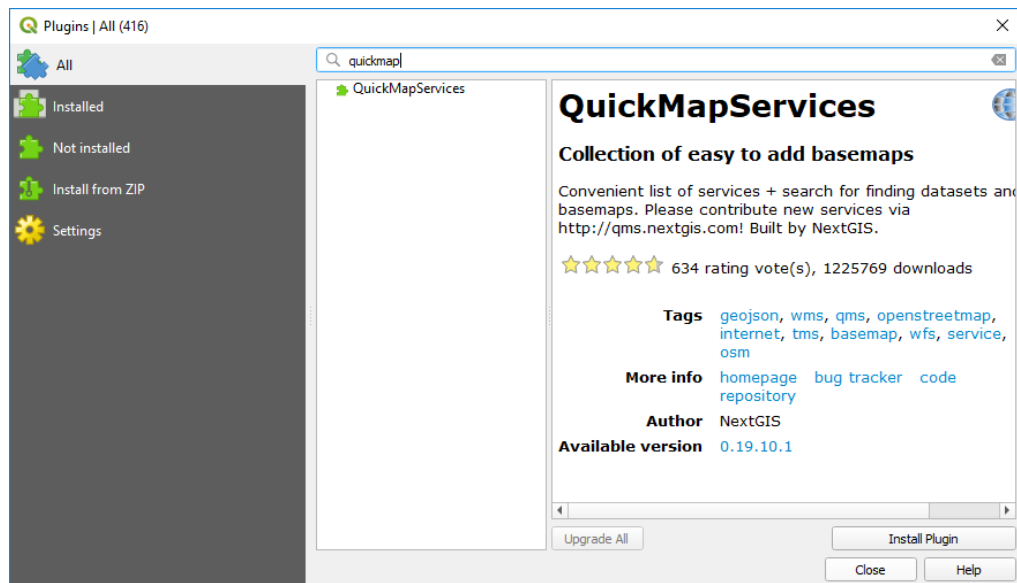

Key Questions for the Afternoon

- What are Spatial Joins?

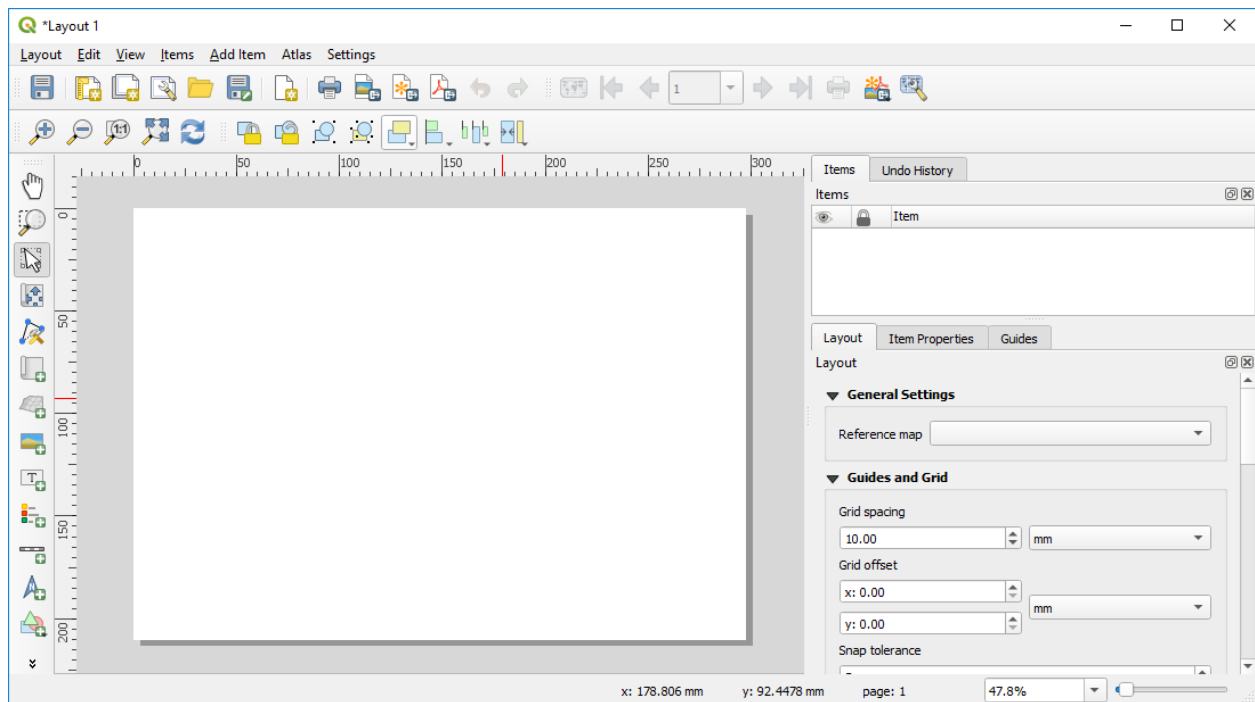

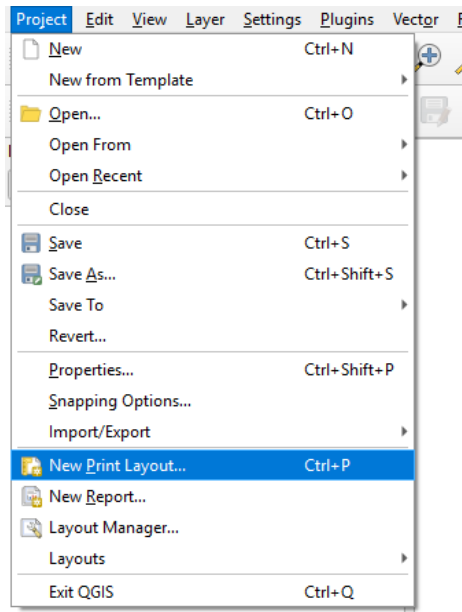

- Why do we use them?

- Types of Maps

Adding Base Maps

QGIS Print Layout

Add New Map

Add Title/Annotation

- What is Open Source?

- Why is it Important?

About Datapolitan

For over 5 years, Datapolitan has worked to empower public sector clients with the skills, techniques, concepts, and mindsets necessary to make data meaningful and actionable to effectively manage their resources and realize operational value from the information they collect. We do this through a range of consulting and training services for local government agencies and nonprofit organizations, customized to their strategic vision and operational needs.
